

PROHIBITION OF SALES TO EEA AND UK RETAIL INVESTORS - other than with respect to offers of the Notes in Sweden during the period from and including 5 October 2020 to and including 6 November 2020, the Notes are not intended to be offered, sold or otherwise made available to, and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("EEA") or the United Kingdom ("UK"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); (ii) a customer within the meaning of Directive (EU) 2016/97 (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; of (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (the "**Prospectus Regulation**"). Consequently, save as provided above, no key information document required by Regulation (EU) No. 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to any retail investor in the EEA or in the UK may be unlawful under the PRIIPs Regulation.

2.3 What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

Credit risk: The risk of losses because debtors fail to meet all or part of their payment obligations to the Group. Credit risk includes counterparty credit risk. Counterparty credit risk arises as a combination of credit risk (a deterioration in the creditworthiness of a counterparty) and market risk (the potential value of derivatives contracts). Danske Bank Group takes on counterparty credit risk when it enters into derivatives transactions (interest rate, foreign exchange, equity and credit contracts) and securities-financing transactions.

Market risk: The risk of losses or gains caused by changes in the market values of the Group's financial assets, liabilities and off-balance-sheet items resulting from changes in market prices or rates. Market risk affects the Group's financial statements through the valuation of on-balance-sheet and off-balance-sheet items: some of the Group's financial instruments, assets and liabilities are valued on the basis of market prices, while others are valued on the basis of market prices and valuation models developed by the Group. In addition, net interest income generated through the non-trading portfolio will be affected by the level of interest rates.

Liquidity, funding and capital risk: The risk that the Group has to issue liabilities or own funds at excessive costs, is unable to pursue its business strategy due to balance sheet requirements and restrictions, or the Group ultimately cannot fulfil its payment obligations due to lack of funds. Liquidity risk is the risk that a lack of funding leads to excessive costs or prevents the Group from maintaining its business model or fulfilling its payment obligations. Capital risk is the risk of not having enough capital to cover all material risks arising from the Group's chosen business strategy.

Insurance and pension risk: Danske Bank Group's insurance and pension risk consists of the risks originating from its ownership of Danica Pension. This includes market risk, life insurance risk and operational risk. As part of its product offerings, Danica Pension provides guaranteed life annuities; insurance against death, disability and accident; and cover against adverse investment returns. This exposes the Group to underwriting risks such as longevity and disability risks as well as to market risk. Underwriting risk is the risk of losses from the insurance business. At Danica Pension, these risks are almost exclusively life insurance risks, and they arise naturally out of the business model. Most underwriting risks materialise over long time horizons during which the gradual changes in biometric conditions deviate from those assumed in contract pricing.

Non-financial risk: The risk of financial losses or gains, regulatory impact, reputational impact or customer impact resulting from inadequate or failed internal processes or from people, systems or external events, including legal and compliance risks. Non-financial risk consists of operational risk, financial crime risk, conduct risk, technology risk, model risk as well as financial control and strategic risk.

3.3 *What are the key risks that are specific to the securities?*

Risks associated with the Notes include the following:

Liquidity and secondary market risk: the Notes may have no established trading market when issued, and one may never develop. Investors may not be able to sell their Notes easily or at a price greater than the amount invested.

Risk of losing all or some of the investment: many factors are likely to affect the value of and return on the Notes, including interest rates, exchange rates, performance of the reference item and economic, financial and political factors.

The Notes may be modified: the terms of the Notes may be modified without the consent of the investor in certain circumstances. This will not always require the decision of a meeting of investors.

Exchange rate risks: exchange rate movements may adversely impact an investor where the Notes are not denominated in the investor's own currency and the imposition of exchange controls could result in an investor not receiving payment on the Notes.

Risk of adjustment or early redemption following a disruption or additional disruption event: in this case any adjustments made or an early redemption of the Notes at the early redemption amount may not be a favourable outcome for investors.

Credit risk of the Reference Entity: investors are exposed to a credit event in relation to [the/each] Reference Entity. If a credit event occurs investors may lose some or all of the value of their investment.

Risk of Reference Entity replacement or succession: A Reference Entity may be replaced in certain circumstances. This may increase in the credit risk involved for the investors.

Risks relating to the determination of the final price: the auction or other final price will directly affect the return to investors following a credit event. Investors will have no influence in the outcome of any such final price.

Risk for investors of fixed rate Notes: an investor of fixed rate Notes may be unable to sell such Notes or may receive a price that is lower than the value of its original investment if market interest rates increase above the fixed rate payable on the Notes.

Investors have no claim against the reference item: investors are exposed to the performance of the relevant reference item but will have no recourse to such reference item or to the issuer or sponsor of the reference item.

2.3 Vilka nyckelrisker är specifika för Emittenten?

Emittenten är utsatt för följande nyckelrisker:

Kreditrisk: Risken för förluster orsakat av att gäldenärer inte uppfyller hela eller delar av sina betalningsförpliktelser gentemot Koncernen. Kreditrisk inkluderar motpartskreditrisk. Motpartskreditrisk uppkommer genom en kombination av kreditrisk (en försämring av motpartens kreditvärdighet) och marknadsrisk (det potentiella värdet av derivatkontrakt). Danske Bank Group tar på sig motpartskreditrisk när den ingår derivattransaktioner (ränte-, valuta-, aktie och kreditkontrakt) och värdepappersfinansieringstransaktioner.

Marknadsrisk: Risken för förluster eller vinster orsakade av förändringar i marknadsvärden för Koncernens finansiella tillgångar, skulder och poster utanför balansräkningen till följd av förändringar i marknadspriser eller kurser. Marknadsrisk påverkar Koncernens finansiella rapporter genom värderingen av poster upptagna på balansräkningen och poster utanför balansräkningen: vissa av Koncernens finansiella instrument, tillgångar och skulder är värderade efter marknadspriser, medan andra är värderade efter marknadspriser och värderingsmodeller utvecklade inom Koncernen. Utöver detta kommer nettointäkter genererade från den icke-handlade portföljen att påverkas av räntenivåerna.

Likviditets-, finansierings- och kapitalrisk: Risken för att Koncernen måste emittera skulder eller eget kapital till betydande kostnader, inte kan följa sin affärsstrategi på grund av balansräkningskrav och begränsningar, eller att Koncernen inte kan uppfylla sina betalningsförpliktelser på grund av brist på medel. Likviditetsrisk är risken att en frånvaro av finansiering leder till betydande kostnader eller förhindrar Koncernen att upprätthålla dess affärsmodell eller fullgöra sina betalningsåtaganden. Kapitalrisk är risken för att inte ha tillräckligt med kapital för att täcka materiella risker uppkomna genom Koncernens valda affärsstrategi.

Försäkrings- och pensionsrisk: Danske Bank-Koncernens försäkrings- och pensionsrisk består av de risker som härrör från ägandet av Danica Pension. Detta inkluderar marknadsrisk, livförsäkringsrisk och operativ risk. Som en del i dess produkt erbjudanden tillhandahåller Danica Pension garanterad livränta; försäkring mot döden, invaliditet och olycka; och täcker negativa investeringsavkastningar. Detta exponerar Koncernen mot försäkringsrisker så som livfallsrisker och invaliditetsrisker såväl som marknadsrisk. Försäkringsrisker är risken för förluster inom försäkringsverksamheten. På Danica Pension är dessa risker nästan enbart livförsäkringsrisker, och de framträder naturligt som en följd av affärsmodellen. De flesta försäkringsriskerna materialiseras över långa tidshorisonter genom vilka gradvisa förändringar i biometriska tillstånd avviker från de förväntade i prissättningen av avtalen.

Icke-finansiell risk: Risken för ekonomiska förluster eller vinster, inverkan av lagstiftning, påverkan på renommé eller kundpåverkan till följd av otillräckliga eller misslyckade interna processer eller från personer, system eller externa händelser, inklusive juridiska- och regelefterlevnadsrisker. Icke-finansiella risker består av verksamhetsrisk, ekonomisk brottslighetsrisk, uppföranderisk, teknologisk, affärsmodellrisk såväl som finansiell kontrollrisk och strategisk.

Innehavare av Obligationer kan bli föremål för nedskrivning eller konvertering till eget kapital vid tillämpning av det allmänna nedskrivningsverket enligt EU-direktiv 2014/59 / EU ("**BRRD**") vilket kan leda till att innehavare förlorar en del av eller hela sin investering.

Beskattning: Emittenten är inte ansvarig för eller på annat sätt skyldig att betala någon skatt, tull, källskatt eller annan betalning som kan uppstå till följd av ägande, överlåtelse, presentation och överlämnande för betalning av någon Obligation och alla betalningar gjorda av Emittenten ska vara föremål för eventuell skatt, tull, källskatt eller annan betalning som kan krävas att genomföras, betalas, innehållas eller dras av.

Möten: Villkoren för Obligationerna kommer att innehålla bestämmelser för att kalla innehavare till möten för att överväga frågor som påverkar deras intressen generellt. Dessa bestämmelser tillåter definierade majoriteter att binda samtliga innehavare, inklusive innehavare som inte närvarade och röstade vid det relevanta mötet och innehavare som röstade på ett annat sätt än majoriteten.

3.2 Var kommer värdepapperen att handlas?

Ansökan har gjorts av Emittenten (eller för dess räkning) för att ta upp Obligationerna till handel på den reglerade marknaden Nasdaq Stockholm AB.

3.3 Vilka nyckelrisker är specifika för värdepapperen?

Riskerna som är förknippade med Obligationerna är följande:

Likviditets- och andrahandsmarknadsrisk: det finns risk för att det inte finns någon andrahandsmarknad för Obligationerna när dessa emitteras och det är möjligt att en sådan aldrig utvecklas. Det är möjligt att investerare inte på ett enkelt sätt eller till ett pris högre än det investerade kommer att kunna sälja sina Obligationer.

Risk att förlora hela eller delar av investeringen: många faktorer kommer sannolikt att påverka värdet och avkastningen av Obligationen, däribland inkluderat ränta, valutaväxlingskurser, utveckling av referensobjekt och ekonomiska, finansiella och politiska faktorer.

Obligationerna kan ändras: villkoren för Obligationerna kan i vissa fall ändras utan investerarens godkännande. En sådan ändring kommer inte alltid att fordra beslut genom innehavarmöte.

Valutakursrisker: valutakursrörelser kan påverka en investerare negativt där Obligationerna inte är denominerade i investerarens egen valuta och införandet av valutakontroller kan leda till att en investerare inte får betalning på dessa Obligationer.

Risken för justering eller förtida inlösen som följer en avbrottshändelse eller ytterligare avbrottshändelse: i detta fall ska alla justeringar gjorda, eller en förtida inlösen av Obligationerna för det förtida inlösenbeloppet, inte resultera i något gynnsamt resultat för investerare.

Kreditrisken för Referensobjektet: investerare exponeras mot en kredithändelse avseende [varje] Referensobjekt[et]. För det fall en kredithändelse inträffar kan investerare förlora en del eller hela värdet av deras investering.

Risken för Referensobjektets ersättande eller succession: Ett referensobjekt kan komma att ersättas i vissa fall. Detta kan öka investerarnas kreditrisk.

Risker kopplade till avgörandet av det slutliga priset: auktionen eller annat slutligt pris kommer att ha direkt påverkan på avkastningen till investerare efter en kredithändelse. Investerare kommer inte ha något inflytande över resultatet av sådant slutligt pris.

Risker för investerare av Obligationer med fast ränta: en investerare som investerar i Obligationer med fast ränta riskerar att inte kunna sälja sådana Obligationer eller riskerar att få ett pris som är lägre än värdet av den ursprungliga investeringen för det fall marknadsmässiga räntor stiger över den fasta räntan som utbetalas enligt Obligationerna.

Investerare har inga rättigheter gentemot referensobjektet: investerare är exponerade mot utvecklingen av relevant referensobjekt men kommer inte ha någon regressrätt mot sådant referensobjekt eller gentemot emittenten eller sponsorn av referensobjektet.
