#### What are the key risks that are specific to the securities?

##### Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

#### 1. Risks related to the structure of the securities:

The return on the securities depends on the performance of the Underlying Reference(s) and whether knock-in or knock-out features apply. Investors may be exposed to a partial or total loss of their investment.

#### 2. Risks related to the underlying and its disruption and adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities.

Exposure to indices, adjustment events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities.

#### 3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

#### 4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

#### Mest väsentliga riskfaktorer som gäller garanten

1. En väsentlig ökning i nya avsättningar, eller ett underskott i nivån på tidigare redovisade avsättningar som varit exponerade för kreditrisker och risker vad gäller motparter skulle negativt kunna påverka BNP Paribas Grupp verksamhetsresultat och finansiella ställning.
2. Ett avbrott eller en störning i BNP Paribas Grupp informationssystem kan förorsaka väsentlig förlust av kundupplysningar, skada BNP Paribas Grupp rykte och leda till ekonomiska förluster.
3. BNP Paribas Grupp kan ådra sig väsentliga förluster vid handels- och investeringsverksamhet till följd av valutakursfluktuationer och volatilitet.
4. Justering av balansvärdet på BNP Paribas Grupp värdepappers- och derivatportfölj och BNP Paribas Grupp egen skuld skulle kunna ha en negativ effekt på årets resultat och eget kapital.
5. BNP Paribas Grupp tillgång till och kostnader för finansiering skulle kunna påverkas negativt av nya ekonomiska kriser, sämre konjunkturläge, lägre kreditvärdering, ökning av kreditspreaden eller andra faktorer.

#### Vilka är de centrala riskerna som är specifika för värdepapperna?

##### Mest väsentliga riskfaktorer som är specifika för värdepapperna

Det finns även risker som är förknippade med Värdepapperna, inklusive:

#### 1. Risker som är relaterad till värdepappernas struktur:

Avkastningen på värdepapperna beror på avkastningen på de underliggande referenserna och om knock-in- och/eller knock-out-funktion tillämpas. Investerare kan exponeras mot en partiell eller fullständig förlust av sin investering.

#### 2. Risker som är relaterade till de underliggande och dess avbrott och justeringar:

Indexvärdepapper är kopplade till utvecklingen på underliggande index (ett "index"), som kan innehålla olika tillgångsklasser såsom aktier, obligationer, utländsk valuta eller värde på fastigheter eller kan referera till en blandning av tillgångsklasser. Investerare i Indexvärdepapper står inför risker som har ett bredare spektrum, vilket betyder att tillgångarna som Index baserar sig på inte utvecklar sig som man tror jämfört med en investering i en konventionell obligation. Därför är avkastningen på en investering i Indexvärdepapper antagligen mer negativt än en investering i konventionella obligationer.

Exponering mot index, justerade händelser och marknadsavbrott eller misslyckad handel kan ha negativa effekter på värdepapperets värde och likviditet.

#### 3. Risker som är relaterade till handel med värdepapper:

Kursen på Värdepapper kan påverkas av ett antal faktorer inklusive, men inte begränsat till, det gällande priset eller nivån på Underliggande Referenser, återstående tid på Värdepapperets planerade inlösendag, aktuell eller implicit volatilitet som är förknippat med den Underliggande Referensen och risken med det inbördes förhållandet till gällande Underliggande Referens(er). Möjligheten att Värdepapperets kurs kommer att fluktueras (antingen uppåt eller nedåt) beror på ett antal faktorer som investeraren nog borde överväga innan köp eller försäljning av Värdepapper.

#### 4. Rättsliga risker:

Villkoren för Värdepapper kommer innehålla bestämmelser för hur man ska kalla till möten mellan innehavare av aktuella värdepapper för att belysa frågor som generellt sett påverkar deras intressen. Dessa bestämmelser ger angivna majoriteter rätten att fatta beslut som binder alla innehavare, inklusive innehavare som inte har närvarat eller röstat på aktuellt möte och innehavare som röstat mot majoriteten.
