What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and whether knock-in or knock out features apply. Auto-callable Products include automatic early redemption mechanisms. Depending on the applicable formula, if an automatic early redemption event occurs investors may be exposed to a partial loss of their investment. Investors may be exposed to a partial or total loss of their investment.

2. Risks related to the underlying and its disruption and adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities.

Exposure to indices, adjustment events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities.

3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Vilka är de centrala riskerna som är specifika för värdepapperna?

Mest väsentliga riskfaktorer som är specifika för värdepapperna

Det finns även risker som är förknippade med Värdepapperna, inklusive:

1. Risker som är relaterad till värdepappernas struktur:

Avkastningen på Värdepapperna beror på avkastningen på de Underliggande Referenserna och om knock-in- eller knock-out-funktion tillämpas. Produkter som löses in automatiskt omfattar mekanismer för automatisk tidig inlösen. Beroende på tillämpningsformeln kan investerarna, om en automatisk tidig inlösenhändelse inträffar, exponeras mot en partiell förlust på investeringen. Investerares kan exponeras mot en partiell eller fullständig förlust på investeringen.

2. Risker som är relaterade till de underliggande och dess avbrott och justeringar:

Indexvärdepapper är kopplade till utvecklingen på underliggande index (ett "index"), som kan innehålla olika tillgångsklasser såsom aktier, obligationer, utländsk valuta eller värde på fastigheter eller kan referera till en blandning av tillgångsklasser. Investerares i Indexvärdepapper står inför risker som har ett bredare spektrum, vilket betyder att tillgångarna som Index baserar sig på inte utvecklar sig som man tror jämfört med en investering i en konventionell obligation. Därför är avkastningen på en

investering i Indexvärdepapper antagligen mer negativt än en investering i konventionella obligationer.
Exponering mot index, justerade händelser och marknadsavbrott eller misslyckad handel kan ha negativa effekter på värdepapperets värde och likviditet.

3. Risker som är relaterade till handel med värdepapper:

Kursen på Värdepapper kan påverkas av ett antal faktorer inklusive, men inte begränsat till, det gällande priset eller nivån på Underliggande Referenser, återstående tid på Värdepapperets planerade inlösendag, aktuell eller implicit volatilitet som är förknippat med den Underliggande Referensen och risken med det inbördes förhållandet till gällande Underliggande Referens(er). Möjligheten att Värdepapperets kurs kommer att fluktueras (antingen uppåt eller nedåt) beror på ett antal faktorer som investeraren nogra borde överväga innan köp eller försäljning av Värdepapper.

4. Rättsliga risker:

Villkoren för Värdepapper kommer innehålla bestämmelser för hur man ska kalla till möten mellan innehavare av aktuella värdepapper för att belysa frågor som generellt sett påverkar deras intressen. Dessa bestämmelser ger angivna majoriteter rätten att fatta beslut som binder alla innehavare, inklusive innehavare som inte har närvarat eller röstat på aktuellt möte och innehavare som röstat mot majoriteten.

Mest väsentliga intressekonflikterna rörande erbjudandet eller upptagandet till handel

Förvaltaren och dess dotterbolag kan också ha varit verksamma, och kan även i framtiden bli verksamma vad gäller investeringar och börshandel och kan utföra andra tjänster för Emittenten och Garanten och deras respektive dotterbolag.

Olika företag inom BNPP-koncernen (inklusive Emittenten och Garanten) och Dotterbolag åtar sig olika roller i samband med Värdepapperna, inklusive Värdepappernas Emittent och Värdepappernas Beräkningsombud och kan även utföra handelsrelaterade verksamheter (inklusive risksäkringsverksamhet) som hänför sig till Underliggande och andra instrument eller derivatprodukter baseras på eller som är relaterade till de Underliggande. Detta kan förorsaka möjliga intressekonflikter.

BNP Paribas Arbitrage SNC som verkar som Förvaltare och Beräkningsombud, är ett Dotterbolag till Emittenten och Garanten och potentiella intressekonflikter kan finnas mellan Värdepappernas innehavare, inklusive och med hänsyn till vissa beslut och bedömningar som Beräkningsombuden måste göra. De ekonomiska intressena hos Emittenten och hos BNP Paribas Arbitrage SNC såsom Förvaltare och Beräkningsombud, är potentiellt motsatta till intressena hos Innehavare av Värdepapperna.

Annat än vad som nämnts ovan och såvitt Emittenten vet, har ingen person som är involverad i Värdepappersemissionerna något intresse i erbjudandet, inklusive de motstridiga intressena.
